

MINISTRY OF ENVIRONMENT, CLIMATE CHANGE & FORESTRY

Livelihoods Diversification

To Enhance Sustainable Forest Management in the Southern Rangelands of Kenya, Women are in the Forefront in Promoting Alternative Livelihoods by Adopting Innovative Nature-Based Solutions

Beekeeping generates income to communities and mitigate on climate change

Bead-making promotes culture, beauty as well as generating income to communities

Use of clean cooking jikos save on the environment as well as human health.

Trees and shrubs from the rangelands have medicinal value that generate income to the communities

Women harvest grass seeds for re-seeding, bale grass into hay and sell to generate income.
