Did You Know?

Vehicular Emission is A Silent Killer

A person shall not cause or allow emissions from a vehicle beyond the prescribed standards.

Health Effects

Vehicle emissions have a range of negative health effects.

- **Respiratory problems:** Exposure to air pollutants from vehicle emissions can cause respiratory issues such as bronchitis, asthma, and lung cancer
- **Cardiovascular disease:** Fine particulate matter from vehicle emissions has been linked to heart attacks, strokes, and other cardiovascular problems.
- **Neurological effects:** Some chemicals in vehicle emissions, such as lead, have been linked to neurological problems, including developmental delays and decreased cognitive function.
- **Cancer:** Long-term exposure to some pollutants in vehicle emissions, such as benzene, has been linked to an increased risk of certain types of cancer.
- **Other health problems:** Vehicle emissions can also cause headaches, dizziness, nausea, and eye, nose, and throat irritation.
